PLAY IN GREEN WITH US!

Let's make a brighter future together.

Thanks to ecological products from our offer,
it will be child's play.

Green PROMO

WE USE | Ecological carton fillers
Recycled paper for printers
Reusable tableware

WE AVOID | Cotton bags from Countries with higher risk
of workers and environment exploitation

WE LOOK FOR | New ways to be green at work
New green products and inspirations, everyday

WE SUPPORT | Employees in using bicycles to and from work

WE INVITE | You to be green with us!

NATURAL MATERIALS

NATURAL MATERIALS

Products entirely or partially made of environmentally friendly materials such as: bamboo, wood, cotton, cardboard, cork and biodegradable materials.

BAMBOO ALL AROUND

V0324-18 Bamboo wireless charger, works with mobiles with inductive charging function, input 5V/2A, output 5V/1A

bamboo

SECOND LIFE OF THE WHEAT STRAW

When we talk about cereal, we usually refer to the main product – grain. In its shadow remains another valuable raw material that is a by-product of cereal cultivation - straw.

Traditionally, wheat straw has been treated as waste. In some countries it is burned which causes air pollution. However, these blades still have value. This material is recovered and used to produce a growing range of advertising gadgets.

V0378-00 Eco wireless speaker BT 5.0 3W, working distance up to 10 m, USB rechargeable

wheat straw, ABS

V0370-00 Wireless speaker BT 5.0 5W, wireless charger 10W with fast charging function, works with mobile phones with inductive charging function, working distance up to 10 m, USB rechargeable

Growing environmental awareness has made it increasingly popular to use **organic cotton**, which:

- ✓ is grown in a way that does not harm nature, with limited water consumption and without the use of chemicals,
- ✓ the profits from crops reach local farmers rather than world companies.

Did you know, that...

Bamboo, as a plant rarely attacked by pests, from the moment it sprouts, does not need a gram of chemical fertilizers or pesticides to grow.

It's grass and, unlike trees, once cut, it sprouts after a few years.

PLA

PLA - polylactide (polylactic acid) is a fully biodegradable polymer of natural origin. It is obtained from renewable raw materials, e.g. cornmeal or sugar beet. Approximately 2.5 kg of corn are needed to produce 1 kg of PLA.

The use of this material, as well as of other bioplastics, is growing. In 2016, around 4.2 million tons of them were produced worldwide, according to estimates by 2021, this number is expected to increase to 6.1 million tons.

RECYCLED MATERIALS

Products made in whole or in part from recycled materials. Durable and stylish.

IT IS ESTIMATED THAT APPROX. 60 KG OF WASTE PAPER IS CONSUMED ANNUALLY BY 1 PERSON

The positive effects of paper recycling are: reduction of tree cutting, reduction of the size of landfills, reduction of paper production costs, lower oil and energy consumption, cleaner air.

About 7.5 kg of wood is needed to produce 1 ream of "normal" or white paper. In Poland alone, nearly 200,000 reams are consumed per day!

By choosing ecological paper, i.e. 100% recycled paper, we save about 50 liters of water and 10 kWh of energy on every 500 sheets of paper.

Look how easy it is!

Check the recycling process for paper and cardboard.

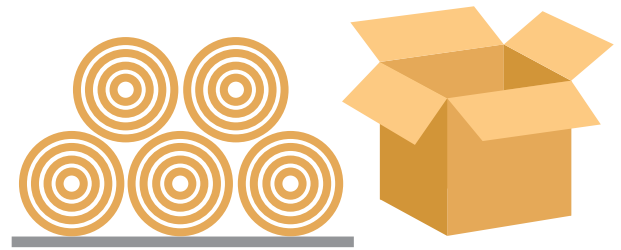

1 SORTING

Paper and cardboard are collected in special containers and transported to the sorting plant.

4 PAPER ROLLS

Paper rolls are used to produce new packaging. This is how the recycling process comes full circle!

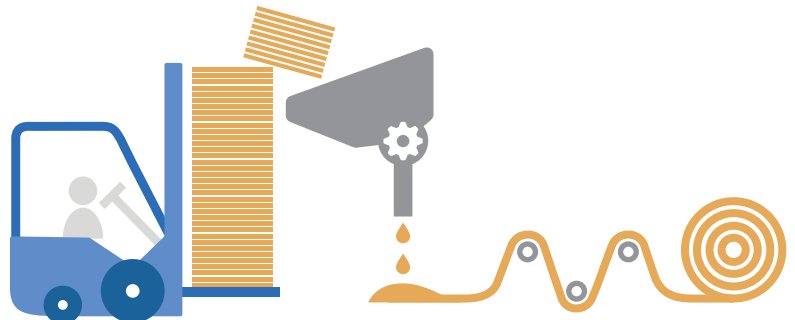

2 SORTING PLANT

In the sorting plant, paper and cardboard undergo a selection process and then transported to the paper mill.

3 PAPER MILL

Paper and cardboard are processed into cellulose pulp, which is then drained and dried. The mass prepared in this way is fed to presses, which transform it into a role of paper.

Consistent recycling of secondary raw materials significantly contributes to reducing the consumption of non-renewable natural resources, which are gradually shrinking. For example: by recovering 1 tonne of plastic, you can save between 700 and 800 kg of crude oil.

DID YOU KNOW, THAT...

IT TAKES FIVE PET BEVERAGE BOTTLES TO MAKE A THREAD, WHICH WILL BE USED TO PRODUCE ONE SPORTS T-SHIRT.

SUSTAINABLE

Sustainable packaging is the last distinguishing feature of the products making up the GREEN PROMO offer.

Packaging of promotional items with this icon has been kept to a minimum or may be reused. It is also often made of recycled materials.

THIS FITS PERFECTLY WITH THE ECOLOGICAL PRINCIPLE OF 3R (TRANSLATED INTO POLISH - 3U) - REDUCE (UNIKAJ), REUSE (UŻYWAJ PONOWNIE), RECYCLE (UTYLIZUJ).

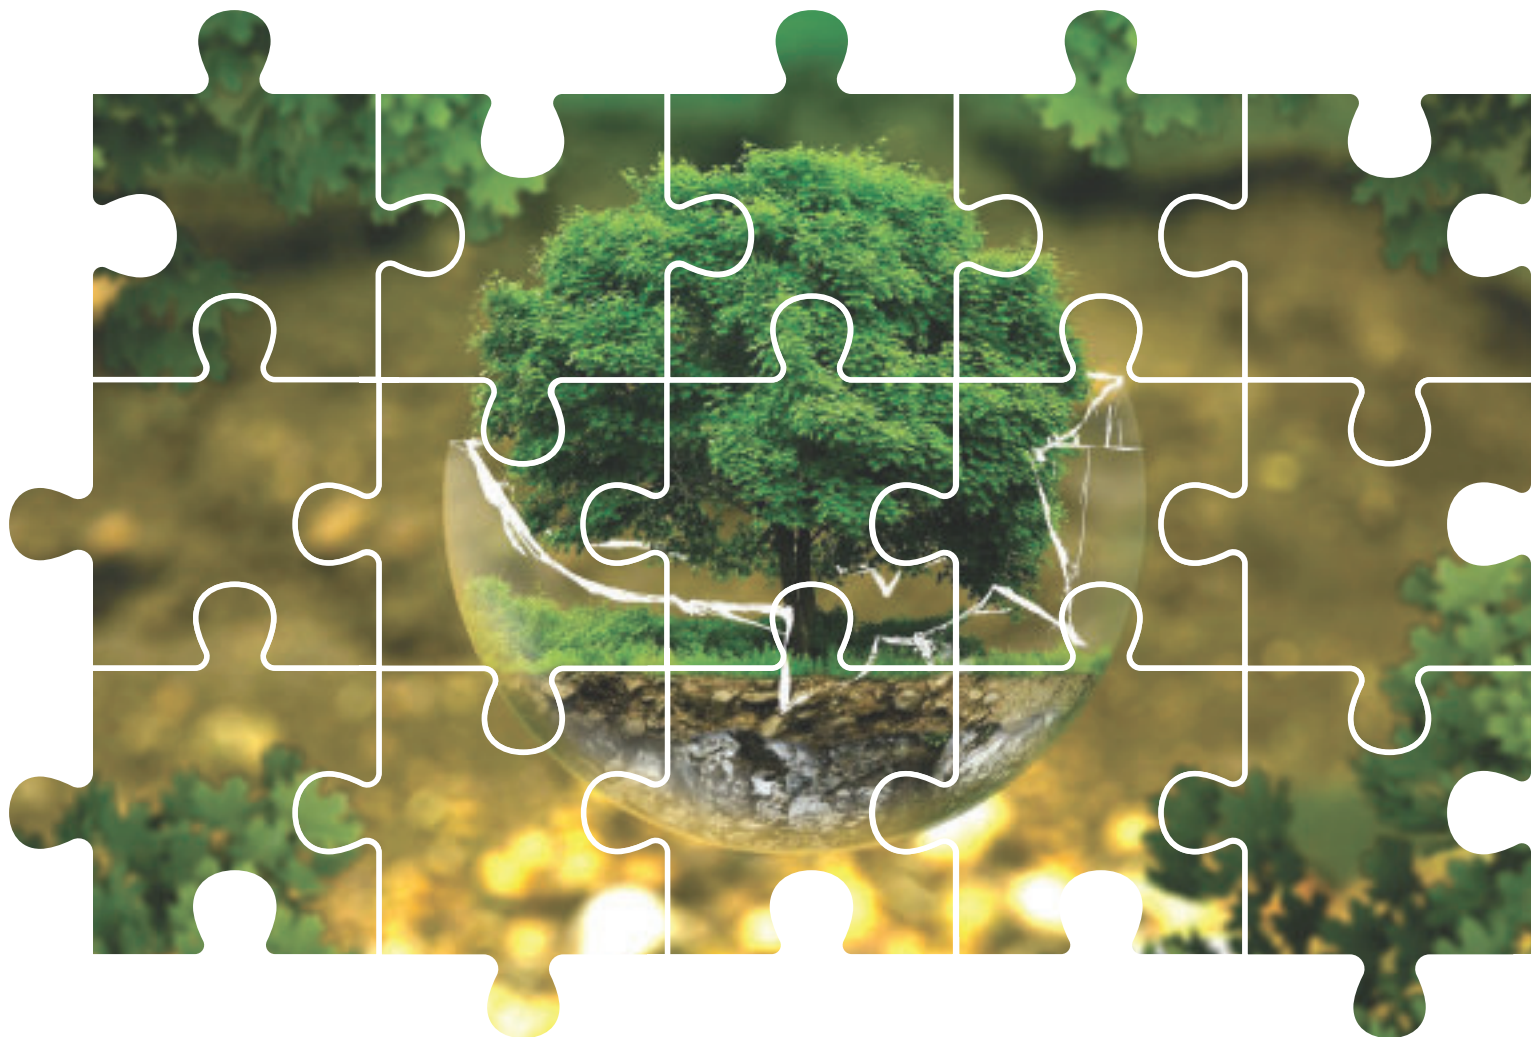

PACKAGING

This approach is the basis for waste management in the era of drastically diminishing natural resources, threats resulting from global warming and increasing levels of air and water pollution.

**THANK YOU FOR PLAYING
IN GREEN WITH US!**

Colours of products in the catalogue may slightly differ from actual products.
